- **5**²) Hay que conceder permisos al nuevo certificado en función del sistema operativo de la máquina desde la línea de comando.
 - **PARA 2003 (IIS 6)** winhttpcertcfg -g -c LOCAL_MACHINE\My -s INTRANET.MITYC.AGE -a IIS_WPG
 - PARA 2000 (IIS 5) winhttpcertcfg -g -c LOCAL_MACHINE\My -s INTRANET.MITYC.AGE -a ASPNET

Cuando el asunto del certificado contiene espacios en blanco o es muy largo, después del parámetro -s se puede introducir una parte significativa de la cadena en vez de todo el literal en este caso por ejemplo: winhttpcertcfg -g -c LOCAL_MACHINE\My -s MITYC -a IIS_WPG

- Ejemplo visual:

6º) Introducción de la URL para la obtención del Token y del asunto del certificado en el WebConfig del Servicio Web de SOROLLA

Estos datos serán solicitados al grupo de desarrollo de SOROLLA en el teléfono 91 583 14 35 (José Pedro Pascual).
